

OIS.

Opportunity Intelligence System

*"We use AI to identify proven startup models abroad
and transform them into opportunities for emerging markets."*

CDG CAPITAL

THE PROBLEM

Blind Copying

Entrepreneurs in emerging markets replicate foreign ideas without understanding why they succeeded — or whether local conditions support them.

No Structured Intel

Access to structured market intelligence is limited. Founders lack validated business model data or sector gap analysis for local contexts.

Weeks of Manual Research

Traditional market research takes 2-4 weeks, is subjective, and outputs rough notes — not investor-ready reports.

"Réduire le risque entrepreneurial par l'intelligence de données."

THE SOLUTION

An AI-powered platform that analyzes successful startups in advanced economies and generates validated, localized opportunities for emerging markets.

< 5 Minutes

SPEED

Full market gap discovery in under 5 minutes. Zero guesswork. Instant actionable output.

Global → Local

LOCALIZATION

We analyze Germany, USA, UK markets and cross-reference with Moroccan market realities.

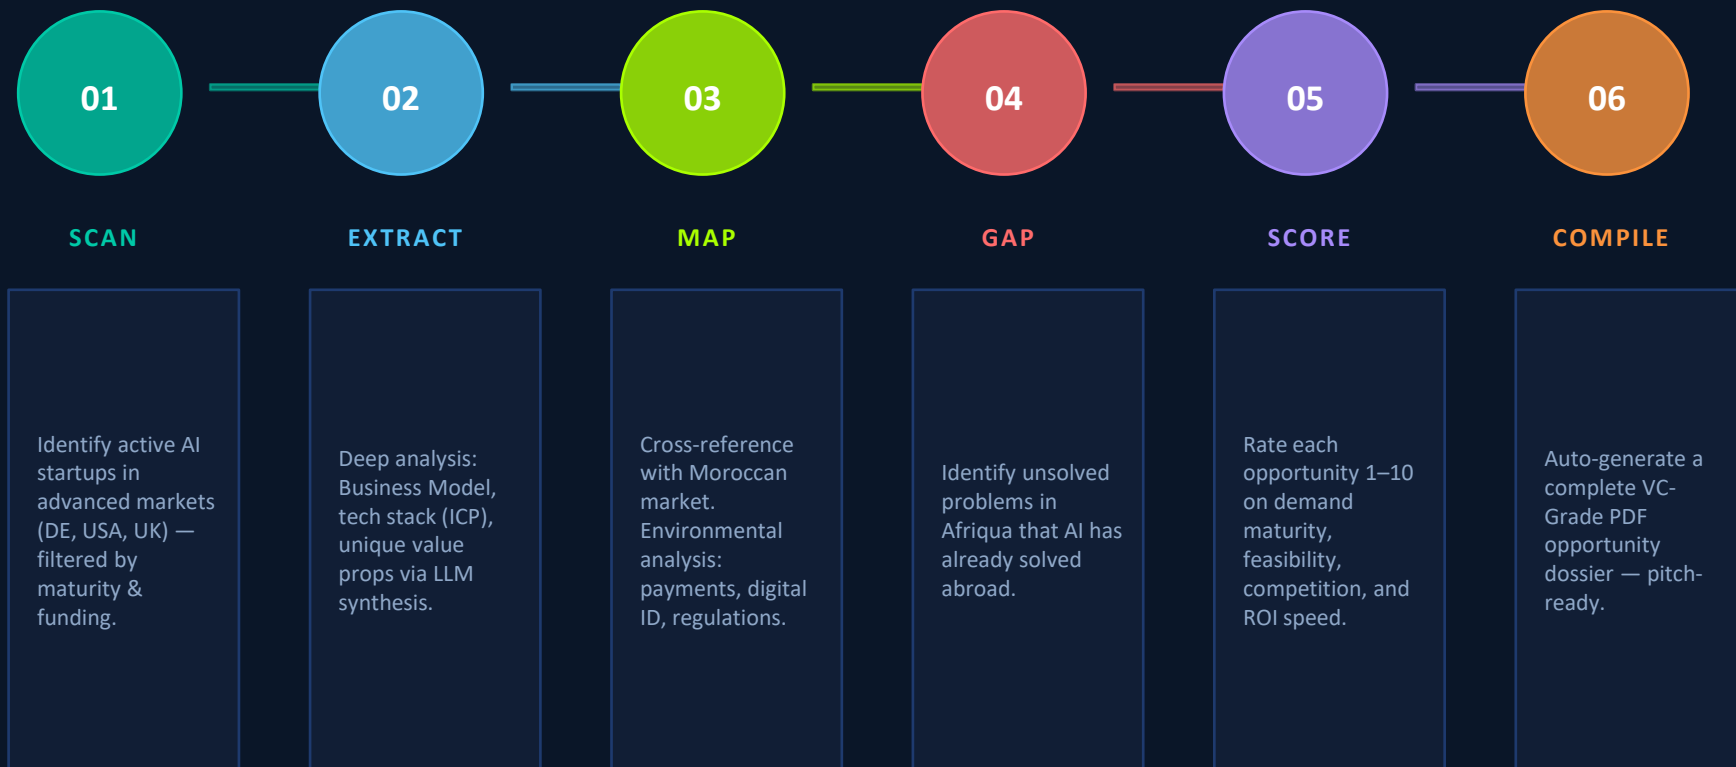

VC-Grade Reports

OUTPUT

Auto-generated PDF opportunity dossier — investor-ready format, pitch-ready layout.

THE INTELLIGENT PROCESS

Turn proven AI
elsewhere into ventures
here.

OIS studies what's working in advanced AI markets, maps it against Morocco's realities, and writes you a VC-grade opportunity dossier in under five minutes.

SCORING LOGIC (1-10)

OIS Viability Formula

$$V_score = (D_market \times 0.4) + (F_tech \times 0.3) + (ROI \times 0.3) \\ \div C_competition$$

D

DEMAND

Maturity of local need. How ready is the Moroccan market to adopt this solution?

F

FEASIBILITY

Regulatory barriers, tech infrastructure, and local implementation requirements.

ROI

RETURN

Speed to monetization. How quickly can a startup generate revenue in this space?

C

COMPETITION

Existing solutions in market. Lower competition → higher score divisor benefit.

REVENUE MODEL

SaaS Subscription

99€ / month

Cloud-first. Monthly access to AI reports, opportunity discovery & sector analysis. Starter / Pro / Enterprise tiers.

Premium Reports

Pay-per-report

Downloadable VC-Grade PDF opportunity dossiers — sector intelligence packages & investor-style analysis.

API Access

Volume-based

Data APIs for accelerators, VCs, incubators, and innovation agencies to embed OIS intelligence in their platforms.

On-Premise Enterprise

Roadmap · Phase 2

ROADMAP

For government & large enterprise clients requiring data sovereignty. Dedicated GPU infrastructure. Unlocked post-traction.

LTV: 4,500€ · CAC: 350€ · LTV/CAC Ratio: 12.9×

WHY WE WIN

Attribute	Classic Research	Generic Databases	OIS Platform
Research Speed	2-4 weeks	Days (manual)	< 5 minutes
Data Depth	Shallow / Manual	Raw listings	Global API — Structured
Gap Precision	Subjective	None	Data-driven scoring
Localization	None	None	Africa-specific*
Output Format	Draft notes	CSV exports	VC-Grade PDF

THE IMPACT

3,000

Target Startups — Morocco 2030

"Become the leading AI platform for cross-market innovation intelligence and startup opportunity discovery."

Supply the blueprints for Morocco's next generation of tech leaders.

Reduce entrepreneurial risk through data-driven opportunity validation.

Bridge the innovation gap between advanced and emerging economies.

Accelerate Morocco's digital transformation roadmap.

LET'S BUILD IT.
